

Reasoning Behind Relationships:

Tickets and Customers Relationship:

A customer can purchase multiple tickets (One-to-Many). Each ticket is associated with one customer, creating a Many-to-One relationship.

Tickets and Movies Relationship:

A movie can have multiple tickets sold (One-to-Many). Each ticket is associated with one movie, creating a Many-to-One relationship.

Concessions and Customers Relationship:

A customer can purchase multiple concessions (One-to-Many). Each concession is associated with one customer, creating a Many-to-One relationship.
